Trillium Woods Future

- Trillium Woods is currently owned by one of the KNL lands developers who agreed to transfer the property to the City of Ottawa, but has not yet done so
- As part of the 40% agreement, if Clublink ultimately strikes down the 40% agreement, there is real risk of the developer applying to redevelop it vs. transferring to the City
- This may include redevelopment as a storm water pond as the overall KNL lands have drainage issues that are currently holding up all development
